

3-D DESIGN

PEACE OF MIND COMES FROM SEEING IT IN 3-D BEFORE IT'S BUILT

It is easier to evaluate a design when you can clearly visualize your project. The Mosby Planning & Design team renders your project in 3-D, giving you the ability to “walk through” the spaces, virtually. You can experience every detail, experiment with different ideas, and make changes in a cost-effective and immediate way.

3-D renderings help you to fully understand the project, and puts you and your remodeling team on the same path before the first hammer swings.

Explore multiple designs • Tour the space in detail
Make changes • Feel certain you're making the right choices

CASE STUDY - KITCHEN REMODEL

Let's follow the design path of a kitchen remodel that assured our client they were making the right choices for their home.

BEFORE

The homeowners desired a higher-functioning eat-in kitchen with a sparkling personality. The narrow wall at the breakfast bar created a psychological barrier to the family room. The dining area was an opportunity for more attractive and precise organization and storage.

DESIGN IDEAS

With the homeowners needs and desires in mind, Mosby designers developed three options for them to choose from:

Option A

Option B

Option C Kitchen

Option C Dining

3-D DESIGN

DEVELOPING THE DESIGN DETAILS

They chose Option C. After selecting their finishes – including cabinets, tile, countertops and flooring – Mosby designers incorporated the details into a realistic Ray Trace rendering.

Mosby's 3-D drafting program also creates detailed technical drawings such as floor plans, elevations, site plans, and construction documents.

Exploring every detail gave them the confidence to approve the final design, with clear expectations of what would be built.

THE RESULTS

The homeowners received a kitchen that has won a national Chrysalis award for remodeling excellence, and has been featured in local design publications. And most importantly, they were thrilled:

"Mosby took our 'must haves' and created a design that exceeded our expectations. The result is a completely fresh, contemporary look that we still can't believe is actually ours. " – Kathy & Dan Brooks
